No more #ToxicAlliance, FAO. You are bound and mandated by the UN Charter to respect human rights and advance the SDGs. Supporting a global corporate poisoner undermines everything else you do.

Don't depends on the corporations. We must find a way to fund ourselves.

Rahul Goswami IN

Shame on FAO for allowing the agrochem, pesticide and industrial seed companies an even bigger role than they have already grabbed. I remind FAO that UN agencies represent peoples under sovereign governments, and NOT predatory corporations.

Idell Fowler US
Wolfgang Obenland DE
Valerie Lonneman US

No pesticides, herbicides. Ban all chemicals. Stop poisoning this planet.

Au nom du Mouvement Pan Africain que j'assume la
présidence "Nous Sommes la Solution" et avec mon
nom propre, je confirme notre conviction profonde et la
promotion de la pratique Agroécologiques qui peut
apporter des changements significatifs sur la justice
climatique.

We understand your historic ties with CropLife through the JMPR arrangement places the FAO at risk of industry capture, & express concern that this association may act to further erode your reputation as an entity working in the greater public interest.

The FAO should remain independent of the interests of agribusiness if the FAO is to maintain credibility.

Prevention is better than cure . Poisoning of any kind of humans , soil , water environment not acceptable by anyone deeply engaged with public health . Believe in Precautionary principle and that Polluter pays .FAO should not let future generations down whatever the compulsions . Dr Mira

Chemical-industrial-GMO corporate commodity monocrop agriculture is **literally** destroying the ecological web of life on Earth. The ecology OF WHICH WE ARE PART.

We need REALISTIC, agroecological solutions to ecological and food crises, NOT pandering to or "partnering" with corporate profiteers whose very reason for being is directly antithetical to ecology.

Killing our soil health means killing our Planet . What will our grandkids eat once agricultural land is too toxic to grow food?

Achille Ngakeng CM
Mirjam HVŞgele DE

Unacceptable this ToxicAlliance!

Beth Burrows US

Whatever the alleged benefits of an FAO partnership with CropLife, such benefits are not worth the costs of such a relationship. An FAO/CropLife partnership will irreparably damage the reputation of FAO and greatly diminish - if not obliterate - whatever trust governments and world farmers now place in FAO.

Mourtada THIAM SN
TOMOYA INYAKU JP

All unite to block this collaboration between FAO and CropLife

Pesticides are a huge problem. They are killing off insects, including pollinators, assaulting biodiversity and poisoning and destroying soils. If FAO chooses to partner with any pesticide company then it has zero credibility. We need to be putting an end to ecocide by phasing out pesticides and moving to regenerative agriculture, not continuing in this blind, greed driven, stupid way where the answer to everything is always more and more pesticides until we have managed to turn the entire earth into a waste land. I'm furious and totally disillusioned that FAO would even consider such a partnership. BTW, I will only eat or grow food organically because I don't want to destroy my health or contribute to the destruction of the planet by eating the toxic food that you are apparently want to cram down our throats.

more pesticides and GM crops are NOT the way to world health-- this will only promote soil degradation, poison agricultural workers and their families, and steer the world AWAY from the soil rebuilding the planet desperately needs. Please renounce this dangerous alliance which will benefit NO ONE except the purveyors of these toxic materials.

Chemicals should have no place in this world. It is beyond me how anyone can think it is a good idea to spew them into the air, water, and ground and put them on our food. these big companies have far too much power and money and they need to be stopped.

Agro chemicals kill all life and make humans sick and sometimes die. So why are you doing this????? Oh, it must be for money. Oh so it is OK to KILL for Money. Something is really wrong here.

END THIS KILLING ALLIANCE NOW!!!!!!

You will kill millions if you listen to CropLife. They of course will make 100s of millions if you do. Just look at what agrochemical, pesticide and seed companies have done to India. Do you want a repeat. Qu Donguy how many farmers must die.

Judith Zingher US

Farmers in India have committed suicide when they can't pay for GMO and are forbidden to save seeds - any seeds. Chemicals are killing the oceans. Tilling increases climate chaos. How many reasons do you need to avoid this partnership? It removes honesty and reliability from the FAO.

Without balanced management that excludes all control by profit-oriented interests that do not care whether they destroy our environment and make non-GMO extinct, our life-sustaining assets -- our oceans and our atmosphere -- are likely to deteriorate beyond sustainability. And we won't be sustainable either. Yet, as of now, we can still choose.

Our health demands that all the poisons added to farming product to be banned. FAO should never compromise their integrity by associating with agrochemical corporations. Please, hear our plea our children are made sick and die a slow death because of those poisons. And our governments fail the people by not getting definitely away from allowing those products full of poisons from being sprayed in our food.

The United Nations did a study a few years ago about world food security and concluded from it that small family farms and subsistence farmers are the best bet against world hunger. The large corporations represented by CroLife have been edging out the family farmers and introduce commodity crops using the land then for money, not growing food. IN other words, not allow the small farmers to do their natural job of growing actual food for their communities.

Pesticides are NOT the answer for healthy life!!!

Big industrial ag has been DISASTROUS for so many small farmers around the world, absolutely, no way, should they be chosen as a partner.

Small farmers feed most of the world. Patented seeds and commercial fertilizer and herbicides and pesticides would destroy them.

How can I say this strongly enough?! Pesticides, chemicals, and genetically modified seeds are ruining life on Earth. Pesticides are collapsing ecosystems all over the globe. Genetically modified seeds are wreaking havoc on the welfare of farmers everywhere. I come from an agricultural state, and I hear the farmers talking about how they can't afford to farm the way they want to---the way that produces good, safe crops and builds up rich, fertile land. They are bullied into going into debt, buying what the industry forces them to buy. This is bad on all fronts. Please, please, do NOT join with CropLife or any other corporation which tears apart traditions and local economies and covers arable land with toxic chemicals. I really care about the Earth and this proposed alliance goes against everything I stand for.

Pesticides not only harm humans, but as they are designed to kill insects, AND it is impossible to contain their spread, and they get into the ground, and water, they kill way more insects than intended. The loss of insects which is occurring now means the collapse of our ecosystems on which life depends. Please consider these points when you decide what to do. Decide on the side of life.

CropLife International's effective presence on and in the ground is poisonous. Their members' mode of operation is to externalize costs at everyone else's expense. Crop Life International represents its members who are known for their lack of regard for health of humans. Any partnership between CropLife International and the FAO would result in more suffering for all of us, including the poisoners themselves.

NO!

Your actions and inactions regarding this and all related concerns have been, are being and will be remembered by all of us who will live in the world that you are shaping with your decisions right now, in addition to being a matter of public record. We are all on it together. Environmental emergencies are affecting everybody,Äôs health and livelihood, and will do so for generations to come. All issues need to be considered as facets of the critical state of the biosphere. Given the consistency with which each current and foreseeable crisis has been weaponized against the vulnerable majority of the population of the United States of America and the world, and the exceptional leniency and overwhelming subsidization of any industry which creates and perpetuates such crises, any failure on your part to directly address and act upon these issues can only be seen as complicity in a clearly genocidal agenda.

FAO SHOULD NOT partner with Croplife International!!

Why on earth would FAO partner or associate with a firm representing malice and destruction?

Qu, if you have any sense at all, avoid "CropLife" like the plague!

The FAO should not accept cosponsorship or working with Big Ag Corporate interests. These Big Ag companies are guided by only one concern: maximize short-term profits. Not helping small farmer agriculture or strengthening of rural economies, not food sovereignty or care for the Environment.

Such considered affiliation is summarily reprehensible, utterly ignoring the ongoing devastation to vital ecosystems, pollinators, and toxic compromising of consumer's health. The FOA must adhere to it's mandate to advocate on behalf of the environment and the populace, without concessions to Big Ag and their nefarious agenda.

The purpose of agriculture is to provide healthy food for people, not to provide riches for investors. Food must not have pesticide residue on it. Some of us can afford to buy organically grown food, but many cannot. They must also have food which promotes health, not causes harm to them.

STOP SPREADING TOXINS IN OUR GLOBAL FOOD SUPPLY!!! For God,Äôs sake, this over dependence on pesticides is POISONING our land and water, killing our bees and critical pollinators, harming our wildlife and balance in our ecosystems, harming and killing humans and destroying the integrity of the very soils we need to survive, leaving them degraded and leaving our food devoid of nutrients and taste. HOW MUCH MORE DAMAGE MUST BE INFLICTED UPON ALL THESE THINGS BEFORE YOU TAKE MEANINGFUL ACTION???

Decades after DDT was removed from our food system, it has been discovered that it created adverse, intergenerational, permanent epigenetic effects. There have been no longitudinal studies to support the safety of products that CropLife supports. Soil health depends on the absence of chemicals; healthy food depends of healthy soil. Please be on the healthy side of history!

The proposed partnership represents a conflict of interest for the FOA, whose job is NOT to put the world's food systems at risk. That is the work of CropLife International. The health of soils, farmers, and anyone who eats food needs to be protected from -- not linked to -- them and their self-serving, short-sighted, profit-focused agenda and actions.

| | | |
|----------|---------|----|
| Margaret | Johnson | US |
| Cheryl | Arthur | US |

Pesticides were once thought to be a welcome product. Until the providing companies got a taste and greed took over. Now these companies have gone really bad, with lies and products that kill people as well as pests. And the animals that are fed some of the leftovers are eaten by mankind. And the poisonous product is as likely as anything to be killing off mankind as well as the insect pests. So I am for whatever is necessary to cut this malignant greed off.

There are too many chemicals being used on farms. These chemicals kill small animals, dogs, and others. Then they run into the water and kill more -- fish and other water creatures, and they contaminate the water for people. Please, do not join in any agreements with this or other chemical companies. Chemicals destroy!!!

In Western Australia, even during Covid and even after years of community complaints and petitions, our public land such as parks, playgrounds, reserves, footpaths and roadsides continue to be sprayed with a variety of agricultural poisons. Since the contamination of their organic farm and ill health suffered due to toxic chemical trespass from neighbouring farms, Ian and Jodi James have been plunged into debt and despair. Our organic farms are at great risk.

As WA and global citizens, and as consumers who support organic, biodynamic and pesticide -free food and water, we are deeply concerned. Our politicians and our public health, environment and food authorities should not support a toxic and polluting industry at our expense.

CropLife actively works against people,Â’s health and is only interested in their own profits. Creating proprietary seeds (and forcing farmers to buy them each year rather than save some for next year,Â’s crop) is wrong. The fact that their seeds require more and more toxic chemicals each year to grow only works for CropLife profits, not the farmers that have to use them. This alliance only profits big business, and actively works against the farmers of the world. For the sake of humanity, please reject this alliance.

This alliance is so very much the wrong direction.

Resilience in the face of environmental challenges rests in rich diversity of locally adapted seeds. An alliance with industrial agriculture will accelerate erasure of sustainable agriculture, use of engineered seeds and pesticides, undermine local self-sufficiency in those places where it remains, and undercut its development elsewhere as international models fail with the climate crisis. Rethink this toxic industrial alliance - precisely the opposite is needed.

C'est important de faire savoir v† la FAO , une grande organisation de l'ONU de se retrouver dans le collimateur de ces entreprises

Dear Director-General Qu Dongyu,

The life supporting qualities of the planet are already facing unprecedented degradation due to global warming and climate change. We certainly do not have to speed up our demise with the escalating use of vilely potent pesticides.

Globally, we should be saving the planet, not further destroying it.

ms. j.

cohen

As a longtime gardener who uses no pesticides, I am appalled at the effect of these toxins on both my garden -- I almost never see butterflies anymore -- and the environment in general. I know from my gardening experience that these chemicals are not necessary for growing healthy abundant crops -- which I do -- and I urge you to stop using them and supporting those who do.

Target: Qu Dongyu, UN Director-General of the Food and Agriculture Organization

The Food and Agriculture Organization (FAO) recently signed a letter of intent to formalize a partnership with CropLife International. CropLife is the global trade association representing all of the largest agrochemical, pesticide, and seed companies. This alliance would be dangerous for the future of our global food systems. Sign on today to tell FAO to stop this #ToxicAlliance!

Toxic disruptors in substances marketed by the largest agrochemical and seed companies sicken and kill not only the natural pollinators but are known to cause adverse human health conditions. They also threaten the livelihoods of private individual farmers. These companies make the future for humans very bleak indeed.

| | | |

The great work the FAO has done in supporting sustainable agricultural practices has been enlightening. I ask that any partnership with CropLife agrochemicals is going to create a great conflict of interest over the need to move away from chemical industrial practices and move toward regenerative organic methods. This alliance will be detrimental to the climate change and add further pollutants to the environment. Please do not formalise this agreement.

Magnolia Turk, Organic Farmer

We are at a critical stage of human and earths evolution. We need to stay focused on positive ways and means to evolve and plan for our and earths future. Those archaic thoughts and practices backed by greed, power and control need to be eliminated and in its place thoughts and practices of communities with compassion resulting in positive and healthy outcomes. It can be done - it must be done - do we want it enough!

| | | |
|-------|---------|----|
| Susan | Loyland | US |
| Mary | Rhodes | US |

we were better at one time. Through the years, everything has been done quicker, easier, cheaper, at the cost of the environment. We need to think of ways to reverse this trend, & help the earth & thus everyone else in the long run.

Don't forget about cutting back our carbon footprint. (and all that entails, including reduce, refuse, reuse, recycle, compost, when you can safely, & living as simply as possible, cutting back on excess, downsizing, etc . . .).

I'm trying, but I think we could do more to encourage others around the world. Including setting a good example ourselves. I'm not sure Trump did the wrong thing. I was not in favor of the Paris Agreement for my own reasons, and I am a tree hugger. I also love this planet & all in it. but the nuclear option could blow it for all of us. (making it worse than it could ever get, because nuclear energy is very dangerous) I sometimes wonder about people who are pushing for the nuclear option. Do they just not know the past mishaps? do they have too much trust in humanity? do they not think of terrorism or other such deeds? Not to mention natural disasters?, etc . . . I think that was a mistake. It, nuclear energy, should not have been included in the answer to our problems. & I worry that

Let Mother Earth live free and clear of chemicals. Put your energies towards birth control instead

Genetically manipulated foods, whether the older 'genetically modified/engineered' or the new 'gene edited' foods, are hazardous to the health of humans and other animals, as well as to the environment. They are tremendously expensive to develop. The money, time and energy spent should instead be used to promote truly sustainable, truly nourishing food grown in harmony with the environment. That would also decrease the emission of greenhouse gases and allow farmers to make bigger profits.

It's vital that we get back to organic, regenerative farming for the sake of our planet and every living breathing creature, including humans

| | | |
|-------|-----------|----|
| Deb | Giannetti | US |
| Karen | Markle | CA |

This must stop. Immediately. The 'green revolution' is a failure. Look at the mess we are in? Industrialized agriculture is killing the planet. Regenerative farming and agroecology is the only way forward. Giant monocultures and the pesticides that support them destroy biodiversity. These companies aren't 'feeding the world'. They are in the business of making money and profit. Period. No matter at what the cost.

We need to carefully decide who each of us partner with

Pesticides should not be marketed or sold based on industry studies. Studies must be independent. The cautionary principle must prevail. There,Ãs an epidemic of longterm health problems including infertility, cancer, children born with neurological problems, autism, autoimmune problems etc. In addition there,Ãs an impact on plant, insect and animal life. Without bees and other pollinators we cannot grow many foods.

FAO must not cooperate with CropLife, a trade association financed by and representing the largest pesticide and biotech companies. This is against the aim of FAO to promote agroecology.

| | | |
|-------|--------|----|
| Bev | Thorpe | CA |
| Linda | Waine | US |

Whose interests are you protecting? And who is at the table with the same voice as the agropesticide industry lobbyists? Critical questions which is why I support this petition.

If we're going to focus on sustainable and healthy farming, we need to avoid as many toxic pesticides as possible. More and more evidence is showing every year that climate change is worsening and many pesticides being used are likely to cause cancer, developmental delays, respiratory disease, hormone and endocrine disruption. It is vital to also ditch pesticides that harm and kill pollinators because pollinators are responsible for one and three bites of food we eat. With hotter and dryer weather increasing every year, we need to implement water conservation practices and one way we can do that is invest in technology that can collect rainwater on a massive scale during the short rainy and snowy seasons we are getting in order to become more drought resilient.

I hope that this is a joke! These pesticides are dangerous and we need to learn to use natural products or eat unsafe food.

| | | |
|-----|------|----|
| Mal | Gaff | US |
|-----|------|----|

Pesticides and the industry promoting them are stupid!
Not long from now insects will be a problem while
growing food during climate change will get extremely
difficult. America has always have a bounty to share but
we may not have enough to feed our people. Insects
build immunity and horrible conditions of climate
equals complete failure!

No more pesticides in agriculture, especially glyphosate (determined a 'probable human carcinogen' by WHO). Please support people-led agroecology and organic farming; do not endanger people's health with an alliance that promotes pesticides.

I am very disappointed that read that The Food and Agriculture Organization (FAO) recently signed a letter of intent to formalize a partnership with CropLife International. CropLife is the global trade association representing all of the largest agrochemical, pesticide, and seed companies. This alliance would be dangerous for the future of our global food systems.

We know how the agrobusiness has led to more hunger. Please, FAO, don't make it worse thank to...FAO

Creating a formal relationship that includes ironclad contracts with the life endangering large corporations will only ensure that crop production will become an endless vicious cycle of reliance on body altering pesticides and herbicides and their accompanying seeds that have been genetically manipulated without full knowledge of all of the potential negative side effects. This is a decision that will have catastrophic consequences on the health of animals and humans for decades to come. The driving force of corporations is their money making ability, not the welfare of the population that will have no input into the food that they consume. Bolstering the smaller sect of family farms, that would be better suited to maintaining the health of their soil and therefore their crops, represents a more sustainable model of how food production can benefit the growers and the consumers.

We need organic, regenerative agriculture, chem-free agriculture, in order to survive.

Join Organic Consumers Association to do good to create abundant crops with healthy land, air and water.

Why destroy life by endorsing CropLife? CropLife is the devil of chem-poisoning death.

FAO should have no part of crop life period, this is selling out to Bayer Monsanto and the rest of the big AG cartels that want total control of our food from seed to table.

FAO needs to rethink this alliance.

The very worst direction that the FAO can go, please stop! Thank you

As a small producer who does not incorporate ANY pesticides in our production...as the UN has stated one solution to battle climate change is to support smaller farms and agroecological methods to REDUCE the reliance on pesticides and the failed ,Äögreen,Äö revolution...

Enough is enough with the power that these corporations have over our food systems and security.

DO NOT support chemically-based agriculture methods.

We, indeed the world itself, need to be freed from toxins in order to regain health. Forming allegiances with the moneyed producers of these toxins is not simply a step backward, it threatens the very health of this planet, already struggling. Rather than working with those toxic corporations, the FAO should be restoring agriculture to its healthy base, restoring the land and water to a clean and productive state all over the world.

There should be no revolving door between corporations and governmental or UN organizations. The interests of the two should not coincide unless true independent research indicates a synergy. I have watched for years as regulatory agencies and international agencies have approved use of known toxins because former members of the corporations sit at the decision making table of their regulators. This does not promote global health, just short term corporate profit.

Please help us to have an free Chemical free world
please help us please sign up

Chemicals on food literally make me ill!! For months, I went to bed with Vicks Salve trying to open my airwaves so that I wouldn't go to sleep wheezing. My holistic doc finally uncovered that it was the chemical sprays on a coffee brand I was drinking. Just 1 cup a day! Turns out, a switch to organic and/or fair trade coffee made me BREATHE again.

I could list other ailments I've had that are food related, but thanks to my doc, I try to uncover and avoid and substitute.

But basically, we have two kinds of food in this country. Food that's whole, organic, and unsprayed and the other kind that will slowly kill you.

I support PAN's endeavors and add my name. On fixed income. Can't afford to contribute at this time.

Pesticides are destroying human health, killing wildlife and pollinators and promoting agribusiness. The world must transition to farming practices that are regenerative, protect small farmers, promote biodiversity and provide the world with healthy food. I am opposed to any and all efforts that promote/partner with agrochemical, pesticide and chemically treated seed companies. They are part of the problem not part of the solution.

Please do not allow "Crop Life" to undermine the successes achieved by organizations boosting a food transition from big Ag, which has poisoned farm workers, children eating food that prevents normal growth, and pollinators, crucial to crop growth. "Crop Life" would continue to lock farmers into a vicious cycle of using their products such as GMO seeds, as well as other poisonous products.

Members of FAO need to look to permaculture techniques and healthy farming skills. There is a huge movement of small farmers trying to salvage soil health - which positively impacts water quality. Do NOT use pesticides/GMOs, and other agro-chemicals. Look online for healthy farming. Look at Youtube. There are many farmers combining old-style (pre-industrial revolution fertilizers and toxins) for improving soil health and food production.

recently, the FAO had signed a letter to formalize a letter in partnership with CropLife International. We know that CropLife is also the global trade association representing all of the largest agrochemical, pesticide & seed companies. Plus the alliance would also be dangerous for the future of it's global food systems, too. We know that CropLife, which promote & produce dangerous pesticides, undermines the FAO's priority of minimizing the harms of chemical pesticide use worldwide. Plus reliance on these pesticides undermines the right to an adequate food supply & community health for present & future generations. Plus more than one-third of it's company sales are highly Hazardous Pesticides that pose the highest levels of risk to the environment. We know that studies show that 385 million cases of acute poisonings each year, up from 25 million in 1990, & the results keep getting deadly. It means about 44% of famers & agricultural workers around the world are poisoned each year by an industry dominated by CropLife members. Plus those products produce by these member companies decimate those pollinator populations & it's wreaking havoc on biodiversity & already fragile ecosystems, too. CropLife is a greedy company & it's sole purpose is to advocate for use of it's products- which are both antiquated chemical solutions & their techno-fixes,

Bad idea to sign the letter of intent with CropLife. The world is drenched in pesticides, one of the factors that contribute to the destruction of life.

From December 2017- January 2018 I lost at least 30 full colonies of honeybees each valued at that time to about \$4000 TTD close to 20,000 USD. In addition people in Trinidad, where cancer is one of the leading cause of death are worried about toxic chemicals on their vegetable and pollution of our ground water. Safe and nutritious food and clean water is a human right. We need to promote a healthy and sustainable environment.

Research shows that agrichemicals are detrimental to soil health because they are toxic to the soil microbial community. These chemicals are also detrimental to the health of farmers, farmworkers and consumers. Do not partner with CropLife.

Climate changes are causing environmental disasters throughout the world. We need to slow, and if possible reverse, the speed of the destruction . We need to use science based solutions. We need to support research. We need to listen to indigenous communities. The agrochemical, pesticide, GMO seed companies cannot be considered partners in these endeavors. Croplife is a trade association. It represents the very organizations that have been contaminating our air, our soil, our crops, and our bodies. They have no place in the United Nations Food and Agriculture Organization. It is their products , their corruption and their greed that are endangering our environment. How is it possible that you are even considering this partnership?

We must stop using poisonous remedies on our food crops and research methods to restore our agricultural soil. Subsidizing individual farms and phasing out corporate agriculture may seem counter-productive, but poisoning our food sources to improve crop production is not the answer.

It's irresponsible for the FAO to provide such a position of influence to for-profit multinationals.

We know from decades of experience that the multinational's only cause is to extract wealth from society.

Do not partner with these companies! Bring them in only when society's needs are identified and protected.

The proposed alliance of FAO and CropLife represents extreme conflict of interest that will be unbeneficial at best and harmful in all probability, to humans, animals, and the environment. You must hold the line so companies involved in toxic pesticide sales are NOT part of this alliance; you must move the line to SUPPORT NON-PESTICIDE PEOPLE-ORIENTED, PEOPLE-LED, AND PEOPLE-PROTECTIVE AGROECONOMIC STANDARDS AND STRATEGIES.

The FAOs commitment to agroecology and family farms is crucial, if not lifesaving for hundreds of thousands farmers and for advancing important steps for a sustainable future. The alliances with the agrochemical business IS the exact contrary. So please, do NOT formalize the partnership with CropLife International!

FAO, WHO.... stop the double standard! stop promoting agrochemicals and substances that destroys our world. Enough harm has already been done due to double standards and hypocrisy. Food security and sustainability can be achieved through nature based approaches like Agroecology. Stop selling the World to crazy agrochemical companies.

Simon Mwamba ZM

This puts consumers and small scale farmers including farmworkers at risk at a time when we are fighting climate change. False solutions are not needed now.

Dee Mullis GB

This is such a retrograde decision. The biodiversity of our planet is under attack and we cannot continue to add to its decline by the continuing use of pesticides. If we used the many, sustainable methods of producing our food that are available which reduce pesticide use, we would be helping our Global insect populations. This is so important and critical for the safety and survival of the human race amongst many other planetary species. Please don't form an alliance which further damages our health and well being.

Our species must stop our harmful practices including poisoning soil, air and water with pesticides. We have the knowledge to grow food and textiles without poisons. Stop allowing profiteers to be in charge. Feildworkers and community members who must breathe the air, drink the water and consume the crops must have the authority. We are ruining the living systems of our planet by using profit as our guide. Community well being at the deepest level of health and happiness must be uppermost.

Es una falta de respeto a todos los que confían y ponen sus manos en la FAO. Hay que tener un criterio lógico. Piense como agricultor, no como empresario. Y si lo quiere hacer con vista empresarial, perfecto! Pero no venga a contradecirse y perjudicar al resto por sus decisiones.

Itzel Yarger US

I am a farmer. An animal farmer who prides in producing high quality chicken and rabbit meat and eggs. An environment which is affected by chemicals robs me the pleasure to feed my animals on healthy food to produce healthy food that provides me a social and economic livelihood. Kindly, the cost of producing food will be very expensive in the long run when foods must be consistently sprayed to be produced. I will soon run out of businesses when my animals aren't eating safe healthy food and those which are expensive to buy to keep my farm running. Thank you.

Chemical pesticides have no place in the environment or in the food that we feed to our children. Would you or a farmer eat a piece of bread that is sprayed with pesticides? If the answer is no, then they don't belong in any of our foods. The people of the world demand organic, nutritious food on our plates. There is no food shortage, especially with 30-40% of all food is wasted. There is a food distribution problem, which is systemic. Treat the root cause of the issue rather than creating more problems with chemicals/GMO's. Our kids deserve a healthy and livable future without checmicals. Thank you for your time and consideration.

Keep the food supply clean and pure.

The world needs to leave industrial agriculture behind and transform the food system to local small scale agroecological and organic farming systems that can feed and regenerate the planet. See: Rethinking Food and Agriculture (2020), Ed by Laila and Amir Kassam. FAO undermines this effort by partnering with Agribusiness.

Invest in agroecology, not toxic alliances!

Nous vous remercions pour exprimer notre profonde préoccupation concernant vos projets de renforcement des liens officiels avec CropLife International. Nous vous exhortons vivement à reconsidérer cette alliance.

Cette collaboration avec CropLife, une association d'entreprises qui produisent et promeuvent des pesticides dangereux, s'oppose directement la priorité de la FAO de minimiser les effets de l'utilisation de pesticides chimiques dans le monde. Le recours aux pesticides dangereux compromet les droits à une alimentation suffisante et à la santé pour les générations présentes et futures. Plus d'un tiers des

ventes des membres de CropLife sont des pesticides Hautement Dangereux qui présentent les niveaux de risque les plus élevés pour la santé ou l'environnement.

Des estimations récentes montrent qu'il y a 385 millions de cas d'intoxications aiguës aux pesticides chaque année, contre 25 millions de cas estimés en 1990. Cela signifie qu'environ 44% des agriculteurs et des travailleurs agricoles dans le monde sont empoisonnés chaque année par une industrie dominée

par les membres de CropLife. Les produits pesticides

Keep CropLife out of the FAO

Dear FAO - why are you even considering partnering with Croplife?

Its a gross conflict of interests and I find it shameful. Is the UN so easy to capture and collude with in plain sight of the whole world?

Are the profits from agribusiness too irresistible that farmer empowerment, nutrition, food security, food sovereignty, ecosystem restoration, soil health, climate change, and robust independent food systems can be traded for the financial gains of agribusiness growth?

Food system transformation does not equal agribusiness growth and opportunities for new business development for the financial sector. Its rather the opposite. Partner with the farmers and the farmer organisations. Not the companies profiting from trapping them to becoming dependent consumers of their products, with debt-mechanisms, and "solutions" that deplete and kill the soil needing more and more chemicals, patented seed, and expensive inputs with every year that passes.

Anna Shevel ZA

It's your job to know better, and your duty to do whats right. Croplife has no place in or with the UN.

To: Qu Dongyu, UN Director-General of the Food and
Agriculture Organization
From: Francis Lenehan

Director-General Qu Dongyu
UN Food and Agriculture Organization
Viale delle Terme di Caracalla
00153 Rome, Italy

Dear Director-General Qu Dongyu,

We are writing to express our deep concern over your
plans to strengthen official ties with CropLife
International. We strongly urge you to reconsider this
alliance.

This collaboration with CropLife, an association of
corporations which produce and promote dangerous
pesticides, directly undermines FAO's priority of
minimizing the harms of chemical pesticide use
worldwide. Reliance on hazardous pesticides
undermines the rights to adequate food and to health
for present and future generations. More than one third
of CropLife member company sales are Highly
Hazardous Pesticides that pose the highest levels of risk
to health or the environment.

Gepke Busaan Warl GB Pesticides kill; affecting insects, plants and human health, causing disease like Covid19

on 27Oktober2021 when a dr took a bone marrow sample she asked whether I had ever worked with pesticides..... I BURST OUR LAUGHING ... she nearly pulled the auger... when i told her ...yes consistantly from Jan 1971 to july2014... and was diagnoed and on treatment for prostate cancer from Des 2005 until the present and that they identified 4 more cancers in May 2020.... that is why she must take bone marrow for evaluation for stemcell therapy procedure.. that was turned down as i have been on chemo for 18mnths ...6 of which was wirh Lenalidomidewhich is an analog to the British THALIDOMIDE event in the 1960's..... so will carry-on with other chemos and have said that due to new-meds I can be asured of meybe 5 years with my current cancerload of 5 cencers.

The Time Is Now ?

Barbara Bello US

Pesticides are applied to vegetables ten feet from my back fence. Pesticide drift was found on leaves outside my back bedroom windows. The farmers solution was to put up a 6 ft. high plastic fence 2 ft from my wooden fence that runs my property line. My solution was to begin planting 250 ft. Out from my back fence. So there was really no solution met. Very frustrating.

vã inconcebivel ser um elemento do sistema das Nações Unidas a promover uso de Pesticidas. Não é o bastante os pestes obsoletos enviados para África?!!!.

Dear UN Director-General Qu Dongyu,

Please do not allow the UN FAO's moral mandate to be threatened by partnering with the profits-over-people trade association CropLife International. The transnational pesticide, agrochemical and genetic engineering corporations that CropLife International represents are anti-democratic concentrations of wealth and power that undermine peoples', communities' and countries' fundamental rights, self-determination and sovereignty, and deepen inequity, injustice and food insecurity. I plead with you not to partner with corporations committed to the "vile maxim" and destruction of people and planet and instead reinvigorate efforts to promote democratic, sustainable, farmer- and community-led approaches to promoting food security and ending hunger.

Sincerely,
matthew vargas

If you truly care about the food supply, you wouldn't formalize a partnership with CropLife International. Knowing agrochemicals deplete the health of our soils creating greater dependency on additives is purely just a money grab by CropLife. Do you intend FAO to be part of that culture instead of looking at the greater good for all long term? I urge you to drop CropLife and listen to your conscious.

No partnership with Crop Life!

Dear Qu Dongyu,
In case you haven't read it, the JOB of the FAO is to reduce world hunger by supporting the livelihoods and well-being of small farmers in rural communities .
Your intent to partner with CropLife International is the exact opposite of the fulfillment of FAO's responsibilities!

The earth does not belong to chemical companies. These companies destroy the web of life that supports the earth.

The Food and Agriculture Organization (FAO) recently signed a letter of intent to formalize a partnership with CropLife International. CropLife is the global trade association representing all of the largest agrochemical, pesticide, and seed companies. This alliance would be dangerous for the future of our global food systems. Sign on today to tell FAO to stop this #ToxicAlliance!

We need to discontinue the ties with Croplife that uses pesticides that poison 385 million people each year. There must be better ways to farm that don't harm people!

| | | |
|--------|-----|----|
| Edythe | Cox | US |
|--------|-----|----|

This would be like making a deal with the devil.

FAO forming a partnership with CropLife is a terrible idea. I've lived a long life. I've watched the harm pesticides have done to our world. I remember when we sprayed DDT in the barns because it kept the flies down. Then we learned that birds were dying and eventually humans started dying from the effects of pesticides. CropLife wants the partnership because they are desperate to continue to sell their pesticides and try to give them legitimacy. We cannot allow this to happen. The harm to human beings is too great to be allowed to continue unabated!

In support of our future food - pure unadulterated health giving sustinance. Thankyou for ensuring our wellbeing.

Humus is the most important capital and measure against wind- and watererosion in the soil. Mulching-systems avoid erosion. Mineral nitrogen fertilizer destroys humus by the priming effect. Plants get sick without humus. This is scientific experience with biological farming.

There is 78% Nitrogen in the air that we can use by crop-rotation with clover and fabaceae = nitrogenfixing fodderplants, alfalfa and trees.

| Carla | Nicoyco | PH |

This alliance is ABSOLUTELY dangerous for the future of our food systems and HEALTH. Doing this would be announcing a war on all life and humanity. NOTHING LESS. Wake up to who these companies are.

Dear FAO, often in rural poor areas of the world farmers have low literacy rate, no adequate access to health care (in case this toxic chemicals enter in their eyes for example) no PPE for spraying, and often no environmental knowledge of soil fertility, where the differentiation between fertilizer and pesticide is just summarised as "medicine". In my over 10 years of experience working in rural areas with food and farming, this has always been something that concerns me. That is why I believe that other types of partnerships should be prioritized. Partnerships that are more aware of the real needs of farmers and their environment and support tackling their often precarious situation through Climate Smart Agriculture and agroecology, encourage and teach circular bioeconomy of their existing chains and support the reduction of post-harvest losses.

We cannot afford to have the UN's foremost body overseeing international agriculture captured by organisations that are rooted in use and promotion of the very fossil fuels that have created the current worldwide crisis in farming and food production. How can the UN call them to account if it is in partnership with them?

such an alliance would have direct negative consequences on the land workers whom you have a duty to protect and support. In addition, it is now scientifically undisputable, that if we do not stop applying chemicals to the soils and destroying the soil organisms; the soil will be rendered non-viable on a global scale.

FAO schould remain independent organisation, not an excuse for those who make money on who make money by destroying the planet and robbing humanity of the future.

Arielle Wright US

The path to a resilient sustainable food system is not in partnership with agribusiness interests! These companies have a profit-motive at their core, not a people or rights-based motive. We need farmers to lead the way, and a return to indigenous and hyper-localized knowledge systems - NOT chemicals.
