We are inviting your input into the next report by United Nations Special Rapporteur on Climate Change and Human Rights Elisa Morgera on

"Technologies related to climate change and their impacts on human rights"

This report will focus on technologies proposed as "Climate Solutions" that could directly impact Indigenous Peoples' rights, lands and territories, food systems, cultures and ways of life. These include:

- **Geo-engineering, including carbon dioxide removal, carbon capture and storage, and solar radiation management/modification;**
- **Fossil fuel-dependent "transition technologies and fuels" in comparison to fossil-free energy generation technologies;**
- **Waste-to-energy technologies;**
- **AI-based "Climate-smart" technologies**
- **Outer space technologies**
- **Indigenous Peoples' technologies based on their knowledge systems and sciences**
